Authorisations with SAP® ERP HCM

> *Together with you we redesign your authorization concept.*
>
> *Your benefit:*
> *A process to optimize your authorization concept:*
> *- Improvement of maintainability and security*
> *- Time and cost savings*
> *- Optimal integration of local users (while minimizing the number of roles)*
>
> Fixed price offer for a one-day workshop: 1.600 Euro

Background:

- ➢ In recent years many organisations have rolled out their SAP HCM system to cover more and more decentralised processes (e.g. to use self services or the Time Manager's Workplace). This led to an ever increasing amount of roles.
- ➢ Other organisations experienced an increasing amount of users due to new subsidiaries or a broader scope of functionality.
- ➢ The former authorisation concept doesn't match your new requirements anymore.
- ➢ The huge amount of roles is getting harder to understand and to maintain.

Services included:

- ➢ Together with you and your system administrators we identify the main issues and their reasons in a one-day workshop
- ➢ The expert explains the possibilities of SAP authorisations including the structural authorisation concept, the context-sensitive security solution, BAdIs etc.
- ➢ The expert suggests approaches to sort out your issues, which will be discussed in detail.
- ➢ Finally we will discuss the process to develop your new authorisation concept.
- ➢ Outcome: An optimized authorisation concept with an action plan.

Fixed price offer:

Our fixed price includes workshop preparation and travel expenses - excluding VAT. (This offer is valid within Germany – for workshops in other countries we will be glad to submit an offer.)
