

# iProCompare for SAP HR:

## Your one stop shop for comparing SAP HR configuration across clients and systems.

*Reducing cost and risk for every update and upgrade.*

**Yes, in theory there shouldn't be any undocumented difference between your development, test and production systems, but we all know that in the real world these differences accumulate over time. So how can you deal with these differences most effectively?**

If you can't be sure that all systems along the transport path have the same configuration in the objects affected by a transport, support package or an upgrade, you have 3 choices:

- Do a manual search for differences with the existing standard tools.
- Rely on your gut feeling and knowledge of transport history plus an element of hoping for the best.
- Guarantee the same configuration across all systems by running a client copy. Something that in theory is very effective, but will not always be possible due to cost, ongoing developments, and availability requirements

So, in the end there is always a mix of inefficient semi-manual work, delays, and some tolerance of risk. Whilst it never really goes wrong, it is just more expensive and creates more small disruptions than necessary. And how confident can you be that none of these disruptions will turn out to be too big to deal with before your next live payroll run?

**Whilst we don't have a silver bullet either, with iProCompare we can offer you a really low cost tool to make cross-system comparisons easier, faster and less error prone**

With **one single transaction**, you can select the features, schemas, calculation rules and configuration tables that you'd like to compare, with a set of handy selection criteria including date of last change or country modifier. No need to go through various different comparison tools and work with multiple spreadsheets to compare.

<input checked="" type="checkbox"/> Feature Comparison	Features (blank: all)		to		
<input checked="" type="checkbox"/> Schema Comparison	Payroll Schema	G*	to		
<input checked="" type="checkbox"/> Personal Calc. Rule Comparison	Personal Calc. Rules	G*	to		
<input checked="" type="checkbox"/> Table Comparison	Tables (blank: none read)	T512W	to		
Country Grouping	08		to		
Wage Type	Q		to	Q	
End Date	01.01.2015		to	31.12.9999	
Start Date			to		

Once you've selected the relevant objects and run the comparison, you get a quick overview of the results:

Object Type	Object Name	# Differences
FEATURE	ABKRS	15
FEATURE	COVER	12
FEATURE		<b>27</b>
PERSONNEL CALC. RULE	G672	1
PERSONNEL CALC. RULE		<b>1</b>
SCHEMA	G000	1
SCHEMA	GAL0	2
SCHEMA	GNT0	2
SCHEMA	GRT0	1
SCHEMA	GT00	1
SCHEMA		<b>7</b>
TABLE	T511	13
TABLE	T512T	85
TABLE	T512W	268
TABLE	T512Z	69
TABLE		<b>435</b>
TABLE		<b>470</b>

You can also access the details to review the actual differences for each component compared, based on the output schema familiar from standard tools:

Compare Ind.	Schema	Line	Function	Par.1	Par.2	Par.3	Par.4	D
ML	G000	013	COPY	XLON				*
MR	G000	013	COPY	XLON				*
L	GAL0	013	ACT30	ZSAC				*
ML	GAL0	016	GBLGP	3	2	2		*
MR	GAL0	015	GBLGP	3	2	2		*
L	GNT0	029	ACT30	ZSAC				*
ML	GNT0	030	GBAPP					*
MR	GNT0	029	GBAPP					*
L	GRT0	013	PET	&030			NOAB	*
L	GT00	050	AVERA					*

For further analysis or changes, you can even get directly into the transactions PE01, PE02 or PE03 for the selected object.

This tool will definitely save you time and money. So, considering the attractive introduction price, what are you waiting for?

### Availability:

iProCompare is available for all customers using SAP HR with a basis release of 600 or higher. It is delivered by transport file, which the customer admin team can easily apply. Whilst the version of the transport will not necessarily be the same as your system, version conflict messages can easily be overridden.

### Price:

The transport file including the tool, user documentation and a lean technical documentation are available for: **GBP 1,900 + VAT**. The tool can be applied on all systems registered for the same customer with SAP. Service providers who'd like to use the tool with several of their customers, need to pay per customer it's installed, but should get in touch for discounts.

(Introduction price subject to change)

### Prerequisites:

A workable background RFC connection between the systems that you want to compare
